

Product Experience Success

Professional Dog Trainer: Wayne C. – Wisconsin
Pet Name: Badger Age: 8 yrs Breed: Labrador

Badger is a Sporting Dog (hunting, field trials, hunting tests, agility competition, fly ball), and he had been experiencing stiffness after getting up from rest, was reluctant to jump into vehicles and tired easily while exercising. Out of all the field dogs I train, Badger exhibited the most improvement while on Hip & Joint. I expect great things out of him this Fall. He is a definitive testimony to the great results he has received from Eniva Hip & Joint Support!

Pet Name: Kate Age: 9 yrs
Breed: Labrador

After eight years of year-round training and having four litters of puppies, Kate now has a spring in her step! This product should give her another year of competing in a more comfortable mode.

Amateur Dog Trainer: Bill B. – Minnesota
Pet Name: Jazzy Age: 3yrs Breed: Labrador
Jazzy is a younger dog that trains for retriever field trials. We use Eniva Hip & Joint Support as a nutritional supplement to ensure his agility and mobility for the future. It helps replenish the necessary nutrients for joint health. Jazzy loves the taste, too!

Cat Owner: Leslie Rockwell – Minnesota
Pet Name: Chester Age: 12 yrs Breed: Tabby Cat

Chester just loves Eniva Hip & Joint Support! He comes to me without calling when I get it out of the fridge. He is really more active around the house.

Dog Owner: Kathie P. – Minnesota
Pet Name: Rebecca Ann

Age: 12 yrs Breed: Labrador
We noticed the difference using Eniva Hip & Joint Support in just 5 days. Rebecca Ann increased her stamina, rested less, played more and took longer hikes. She used to need help getting into the truck, but now she can jump right up all by herself. Plus, she loves to play Frisbee, but to catch a flyer was not happening – until now. All this activity started after Rebecca Ann was taking the Eniva Hip & Joint Support for Animals!

Dog Owner: Clay D. – Kansas
Pet Name: Brandi Age: 15
Breed: English Setter
Eniva's Hip & Joint Support is INCREDIBLE! My older hunting dog had gotten to where I was having to literally carry her up and down the stairs. No more... she does it completely on her own now – at age 15 (105 in human years)!

How Do I Know My Pet Needs a Supplement?

Good nutrition is always an ideal preventive measure to achieve maximum mobility and flexibility for your pet; however when your pet experiences health challenges, a natural solution can be explored with nutritional support through supplementation. It is always recommended to consult your veterinarian regarding appropriate supplement use. The following checklist may help you identify the need for additional nutritional support to assist with repair and maintenance for healthy hips and joints:

- Limping after exercise
- Reluctant to climb stairs
- Reluctant to jump into vehicle
- Stiff for awhile after getting up from rest
- Tires easily while exercising
- Reluctant to engage in exercise
- Rests more often than usual
- Bites or licks at certain joints on legs
- Is uncomfortable when touched on hips or tail and other joints
- Does not seem comfortable when squatting to eliminate waste
- Doesn't want to sit or stand; prefers to lie down

How Long Will It Take To See Results?

Many pet owners see positive results with Eniva Hip and Joint Support ranging from several days to a couple weeks. In other cases, some animals can take up to 6 weeks to see improvement, dependent upon the severity of their condition and how long they have experienced challenges and deficiencies. It is important to give the Eniva Hip & Joint Support daily to experience optimal results and to continue a maintenance regimen of Hip and Joint Support for long-term health.

High-Potency

- Glucosamine
- Chondroitin
- MSM
- Antioxidants
- Type II Collagen

You want the best for your pet – so do we!™

Eniva® Hip & Joint Support™ for Animals

PROFESSIONAL FORMULA

Eniva® Professional Formula HIP & JOINT SUPPORT™ FOR ANIMALS provides veterinarian recommended, ultra pure and high-potency nutrients to support healthy hip and joint mobility for active pets. This all-liquid design is formulated for enhanced absorption and performance.

Liquid Formula for Enhanced Absorption

Eniva Hip & Joint Support for Animals offers the advantage of a LIQUID formula that contains high-potency glucosamine and chondroitin as well as other liquid antioxidants and nutrients. Eniva's all-liquid product is formulated with Eniva's proprietary Cell-Ready® technology that allows for fast delivery and absorption.

The Eniva Hip & Joint specialized liquid formula does NOT contain binders, fillers and coatings needed in solid tablets and capsules which can cause allergies and sensitivity, and which slow down the absorption process.

Its concentrated formula provides a simple, single dose for daily use. Plus, the convenient liquid dosing bottle makes it easy to measure the correct daily dosage and place into pet food or water.

 **You want the best for your pet
– so do we!™**

High-Potency Ingredients with Impact

Glucosamine HCL/Sulfate

– Building block for cartilage and joint repair

Chondroitin – Support for synovium fluid and lubrication

MSM – Protein synthesis and enzyme function for tendons and cartilage

Type II Collagen – Formation of cartilage and anti-inflammatory support

L-Proline – Synthesis of collagen (protein) for formation of connective tissue

Vitamin C – Collagen support for ligaments, bones and joint repair

Manganese, Boron, Calcium and Magnesium
– Healthy bone formation and joint flexibility

These Active Ingredients have been used effectively to support the formation and maintenance of new cartilage, tendons and ligaments in humans and animals. The inclusion of **Type II Collagen and L-Proline** in the Eniva Hip & Joint formula make it unique in the marketplace, plus it aids in **cartilage, connective tissue and anti-inflammatory support**. The Proprietary Blend with antioxidants **Vitamin C and Grapeseed Extract as well as key minerals assist muscle and bone repair** and maintenance of **healthy hips and joints**.

Middle-aged and Older Animals: These ingredients have been shown effective in supporting cartilage formation for animals showing the effects of osteoarthritis (bone density/ strength challenges). The nutritional support also assists with joint mobility, comfort and bone/tendon strength. As animals age, the maintenance of healthy joints is essential since constant wearing down of cartilage needs repair.

Young Animals: Veterinarians recommend glucosamine in younger animals as it delays the onset of joint damage while dogs participate in daily activities of running and jumping. These ingredients are effective in maintaining healthy joint function especially for animals who experience cartilage reduction due to physical stress from strenuous physical activity and nutrient deficiencies. In addition, chondroitin promotes synovium fluid health to promote joint flexibility.

Safety, Quality & Convenience

It's easy to quickly dispense the correct dosage for your pet.

Just squeeze the plastic bottle to accurately measure the liquid nutrients into the dispensing cup.

ACTIVE INGREDIENTS Per 1 ounce (30 mL):	
Glucosamine HCL/Sulfate	1650 mg
Chondroitin Sulfate	1200 mg
MSM (Methyl-sulfonyl-methane)	1500 mg
Type II Collagen	50 mg
L-Proline	50 mg
Manganese (manganous chloride)	25 mg
PROPRIETARY BLEND	55 mg
Ascorbic Acid (Vitamin C), Boron (sodium borate), Calcium (calcium chloride), Grapeseed Extract, Magnesium (magnesium chloride)	
INACTIVE INGREDIENTS: Purified water, sorbic acid and/or benzoic acids (preserve freshness).	

Servings Per Container: Minimum 32

Body Weight	Daily Dosage
1-15 lbs	10 mL (2 TSP)
16-30 lbs	15 mL (1 TBS)
31-50 lbs	20 mL (4 TSP)
51-100 lbs	30 mL (2 TBS = 1 ounce)

DIRECTIONS: For daily use, refer to dosage chart. Note: Dosage can be increased with the advice of your veterinarian.

SHAKE WELL BEFORE USE. For easy application, dose may be added to animal food or water.

STORE IN A COOL, DRY PLACE.

The contents are natural nutrients and are very safe for daily use.

- No Stimulants
- No Artificial Colors
- No Artificial Flavors

Our Commitment: SAFETY & QUALITY
